Bio

Hey, my name is Simon!

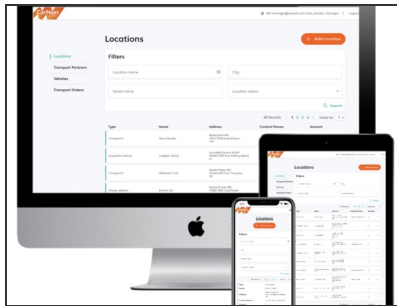

I'm a full-stack developer (javascript/node/rails) with an expertise in front-end.

I'm highly motivated, have a strong work ethic and try to think along with your company. Not only to help solve software-related problems but also in creating checklists, automating repetitive work and analysing and organising information for others to reduce waste of resources (time, energy & money).

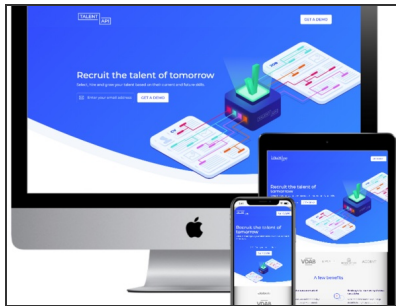

I'd describe my personality as creative, organised, analytical and calm. If you'd believe an MBTI-test, it would label me as an INTJ. I'm also always in for a (dark) joke ;)

My skills: HTML, (S)CSS, Javascript (ES6), React/Vue, Flowtype/Typescript, Node, Ruby, Rails, Gatsby, Contentful, Jenkins, WordPress, & Bash Scripting. What I lack in skills or don't understand yet, I can figure out pretty quickly.

My latest projects:

Carnext

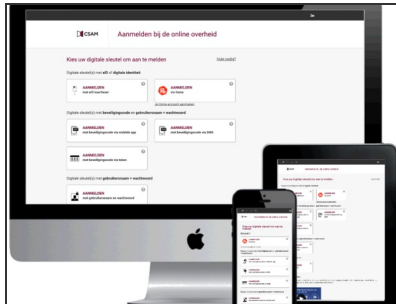

Radix

Van De Velde

Zappware

Fedict

TrueTech
